

I would urge you to reject NAB's petition 04-160 because.....I have 3 xm radios...The service they offer as is is so far beyond what Standard broadcast radio offers?.for instance if I want to get a traffic report for my area here in Southern California?.On XM it takes about 5 minutes of listening as compared to any of the news channels about 50 minutes. By the time I have the report I am already in the thick of the traffic??..so for \$10.00 a month I save an average of 1hour and 45 minutes in a day in drive time just by knowing what is going on in a timely manner. I also help traffic congestion because I am not their and I can drive around???.Thank you for you kind attention.
